

## Sample Loan Computation

Worked example using the system flat-interest formula · working-day collection (Mon–Fri, 22 days / month) · pay until paid

| PRINCIPAL            | RATE (FLAT / MO) | TERM            | WORKING DAYS |
|----------------------|------------------|-----------------|--------------|
| <b>PHP 10,000.00</b> | <b>6%</b>        | <b>3 months</b> | <b>66</b>    |

### 1. One-time loan computation

Interest is **flat on the original principal** for every month of the term (not reducing-balance).

*Total interest = principal × rate × months = PHP 10,000.00 × 0.06 × 3 = **PHP 1,800.00***

*Total payable = principal + interest = PHP 10,000.00 + PHP 1,800.00 = **PHP 11,800.00***

*Per month (exact) = total ÷ months = PHP 11,800.00 ÷ 3 = **PHP 3,933.33***

*Per working day (exact) = total ÷ (3 × 22) = PHP 11,800.00 ÷ 66 = **PHP 178.79***

*Daily split ≈ principal **PHP 151.52** + interest **PHP 27.27** (final day absorbs rounding so the schedule sums exactly).*

| Item                             | Amount        |
|----------------------------------|---------------|
| <b>Principal (capital)</b>       | PHP 10,000.00 |
| <b>Total interest</b>            | PHP 1,800.00  |
| <b>Total payable</b>             | PHP 11,800.00 |
| <b>Exact monthly installment</b> | PHP 3,933.33  |
| <b>Exact daily installment</b>   | PHP 178.79    |

### 2. Pay until paid — computation each month

Each month covers **22 working days**. Paying the scheduled month in full reduces the outstanding balance. After Month 3 the loan is **₱0.00 — paid**. Cash remittance is rounded **up to the nearest ₱5**; the uplift is credited to savings.

| Month        | Principal            | Interest            | Exact due            | Cash (₱5)            | Balance after   |
|--------------|----------------------|---------------------|----------------------|----------------------|-----------------|
| Month 1      | PHP 3,333.44         | PHP 599.94          | PHP 3,933.38         | PHP 3,935.00         | PHP 7,866.62    |
| Month 2      | PHP 3,333.44         | PHP 599.94          | PHP 3,933.38         | PHP 3,935.00         | PHP 3,933.24    |
| Month 3      | PHP 3,333.12         | PHP 600.12          | PHP 3,933.24         | PHP 3,935.00         | PHP 0.00 — PAID |
| <b>Total</b> | <b>PHP 10,000.00</b> | <b>PHP 1,800.00</b> | <b>PHP 11,800.00</b> | <b>PHP 11,805.00</b> | <b>—</b>        |

### 3. Month-by-month detail

**Month 1 — 22 working days**

*Principal recovered: PHP 3,333.44 · Interest portion: PHP 599.94*

*Exact due: PHP 3,933.38 · Cash remittance: PHP 3,935.00 (savings uplift PHP 1.62)*

*Balance: PHP 11,800.00 – PHP 3,933.38 = **PHP 7,866.62***

**Month 2 — 22 working days**

---

*Principal recovered: PHP 3,333.44 · Interest portion: PHP 599.94*  
*Exact due: PHP 3,933.38 · Cash remittance: PHP 3,935.00 (savings uplift PHP 1.62)*  
*Balance: PHP 7,866.62 – PHP 3,933.38 = **PHP 3,933.24***

**Month 3 — 22 working days**

*Principal recovered: PHP 3,333.12 · Interest portion: PHP 600.12*  
*Exact due: PHP 3,933.24 · Cash remittance: PHP 3,935.00 (savings uplift PHP 1.76)*  
*Balance: PHP 3,933.24 – PHP 3,933.24 = **PHP 0.00 — paid***

#### 4. Settlement summary

| Description                                  | Amount        |
|----------------------------------------------|---------------|
| Loan cleared (exact total payable)           | PHP 11,800.00 |
| Total cash collected (3 monthly remittances) | PHP 11,805.00 |
| Rounding surplus credited to member savings  | PHP 5.00      |

Notes: Interest starts on the Monday on/after disbursement. Remaining principal of PHP 1,000.00 or less waives further interest. This document is a sample only; live schedules use the same formula in the loan system.
